

Loving music

Clearaudio product information:

Version: 10 - 2008

Innovation

Fig.:
"Innovation" turntable with
radial tonearm „Universal“

With the "Innovation" turntable **clearaudio** sets new standards in High-End turntable manufacturing.

The "Innovation" comes with an new developed optical speed control (OSC).

The "OSC" consists of an infrared sensor, high precision reflection scale and corresponding speed regulation circuit. The combination of a high mass turntable platter and the patented **clearaudio** CMB magnetic bearing guarantees music reproduction at the highest level resulting in pure authentic High End imaging.

Technical features:

- Precision CNC machined surface, solid stainless steel sub-platter, dynamically balanced
- 70 mm / 2,75 inch main platter, made out of POM material with high density and excellent dimension stability, dynamically balanced
- **clearaudio** patented CMB – bearing technology
- High torque DC-motor, exclusively made for **clearaudio**
- Electronic optical speed control ("OSC") in real time through infrared sensor
- All turntable feet are fine adjustable
- Comfortable speed change (33 1/3 rpm, 45 rpm, 78 rpm)
- Optical speed control (OSC)
- Optional thinner centre spindle available to compensate LP`S eccentricity
- Resonance optimised chassis's shape, belt driven with self adjusting speed control
- Playback with two tonearms possible
- Speed variation less than: $\pm 0,05$ %
- Weight approx: 23 kg (without tonearm and power supply)
- Dimensions approx.: 479mm x 485 mm x 225 mm
18,86 inch x 19,09 inch x 8,86 inch
- Warranty: 5 years*

* Only if the warranty card is filled out correctly and sent back to **clearaudio**
