

LIVING VOICE

AUDITORIUM AVATAR

As compact as the award-winning Auditorium, the Avatar extends the original design concept. This model utilises a substantial increase in technology. We have used the finest hand built components, a vastly superior complement of drive units and a more sophisticated circuit topology. The presentation has remarkable height and depth of field whilst tonal colours are full and natural.

The Avatar has been created specifically for the discerning and critical listener. Meticulous attention has been paid to each and every aspect of design and construction. The result is outstanding musical pleasure.

Technical Summary

750 density hardwood composite enclosure.
Scanspeak D950000 high frequency unit.
High sensitivity D'apollito configuration.
Clarostat non-inductive wire wound resistors.
Optimised crossover layout.
Components toleranced to two decimal places.

Book matched premium veneers.
Star earthing.
Hand wound air core inductors.
Hovland discrete film & foil. Musicaps.
Mechanically isolated crossover.

Specifications

Sensitivity	94 dB	Nominal impedance	6 ohms
Dimensions h/w/d	104/22/28 cms	Loading	Reflex Port
Frequency Response	35Hz – 22.5kHz	Power handling	100 watts
Gross Weight	19 kgs per unit
